## PROFILE

A passionate T-shaped developer specializing in frontend engineering, who is always looking for new challenges to solve. Loves creating interactive, spectacular interfaces, and engaging, immersive user experiences. Proficient in Typescript, HTML, CSS, and the modern javascript frameworks. A good teamplayer, but not afraid to take responsibility, and own things.

## EMPLOYMENT HISTORY

**Front End Developer, Betsson Group**

**Budapest**

Jan 2019 - Present

- Developed new features for an international project in an agile environment
- Used Angular 8 with RxJs, NgRx, Typescript
- Wrote unit tests for the created components and business logic with Jest
- Maintained the application, migrated legacy code, investigated bugs
- Coordinated the release process multiple times
- Communicated with product owners about potential issues and solutions
- Helped newcomers with onboarding, was the assigned mentor multiple times

**Full Stack Developer, Trekhunt International**

**Budapest**

Mar 2018 - Jan 2019

- Built the site from scratch in React / Next.js
- Translated Zeplin designs into code
- Separated chunks of the frontend application into micro frontends
- Created microservices using AWS lambda functions with Node.js
- Streamed, indexed, and consumed data using ElasticSearch
- Wrote web crawlers in Python
- Implemented authentication with JWT tokens

**Junior Web Developer, LogiNet Systems**

**Budapest**

June 2017 - Mar 2018

- Created, and maintained web applications for clients in Symfony (PHP)

## EDUCATION

**Budapest University of Technology and Economics**

**2014-2018**

Electrical Engineering and Informatics (BSc)

## INTERESTS

My hobbies include playing soccer, watching great TV series and developing pet projects on the weekends. I love chatting with people, drinking coffee and grabbing a beer on friday nights.
